

DATE PRO

DATES PRO is an organic growth elixir that we have prepared for crop cultivation. An organic alternative to Urea, DATE PRO is a 360 degree plant food recipe which will provide each and every essential nutrient which the plants need to grow healthier, stronger and ultimately increase output.

- 360 degrees plant food recipe covers each and every essential nutrient in organic form.
- Helps cell division, cell elongation, tillering and vegetative growth.
- Helps in stress tolerance and withstand adverse abiotic conditions.
- Imparts better organoleptic qualities.
- Induces better flowering and reduces flower dropping.
- Helps better grain formation, better fruiting and yield.
- Maintains the integrity of the soil.

It comprises of bioactive humic and fulvic substances of vermicompost birthplace. It comprises of cytokinins, auxins, betaines and gibberellins that are gotten from kelp aging. It comprises of naturally determined N,P,K and follow components from vermi fertilizer and ocean growth which help in better root and shoot development and supplement the plant with fundamental supplements at basic phases of harvest development.
