

Mykrobak N&P Booster

What is Mykrobak N&P Booster?

Mykrobak N & P Booster is a special formulated eco-friendly source of various blend of different nutrients like macro, micro and secondary nutrients, amino acids, vitamins, proteins, carbohydrates and minerals naturally present for enhancing development of biomass, it is very effective for replacement of old conventional additives, This specialized formulation give strength to microbes for cultivate, survive and sustain in harsh condition of the waste water, Super composition of different micronutrients, nitrogen, phosphorus and bio stimulants helps microbes in utilizing complex compounds in waste water.

Benefits

- Enhance the N&P source in the biological tank
- Improve Sludge settling
- Enhance MLSS Development
- Improve BOD & COD Reduction by improving Bacteria Health
- Reduce Sludge hydrolysis

Area Of Application

- Membrane Bio reactor
- Activate sludge process
- Sequencing batch reactor
- Moving bed bio reactor
- Extended Aeration system
- UASB, Anaerobic digester, Anaerobic lagoons
- Water bodies(Pond, Lakes, Drains)
