

# Hydromax

**(Recommended for Trees Flowers, Vegetables & Fruits and Hydroponics)**

Hydromax is a single product designed to provide all the nutrients required by plants in a liquid form with constituents such as basic elements like Nitrogen, Potassium, and Phosphorus.

The requirement varies between the growth phase and reproductive phase. Also, it varies from species to species. It is also dependent on temperature, soil pH, and water substrate. Farmers may need to use other fertilizers if required when the plants show such deficiency symptoms if any. We give individual Mineral nutrients also.

## Composition/Technical Specifications

Components	Qty
Nano Nitrogen	4.01 %
Chemical Nitrogen	9.90 %
Amino Acid	2 %
Nano Phosphorus	0.87 %
Nano Potassium	0.93 %
Nano Calcium	0.06 %
Nano Magnesium	0.04 %
Enzymes	
Organic Acids	
Other Nutrients	

### Benefits

- It is recommended for Hydroponics because of its liquid state and very soluble in water
- Ionic form and is free from other elements like Chlorine which form mineral salts
- Promotes strong and healthy plants

## Dosage & Methods of Application

Depends on the crops, area, and sizes, depending on the method of fertilization.
